Professional Summary

Data Science and Product Analytics professional with experience in AI systems, experimentation, and data-driven decision making. Strong foundation in Python, SQL, machine learning, and user behavior analytics. Proven ability to translate complex data into actionable insights and drive measurable product impact.

Skills

- **Programming & Querying:** Python, SQL, C++, PostgreSQL, Oracle SQL, Jupyter Notebook
- **Product & Data Analytics:** A/B Testing, Funnel Analysis, Cohort Retention, KPI Tracking, Experiment Design
- **Visualization & Tools:** Power BI, Tableau, Excel, Matplotlib, Seaborn, Amplitude, Google Analytics
- **Machine Learning & AI:** Predictive Modeling, NLP, RAG Systems, Prompt Engineering, Model Evaluation
- **Professional:** Agile, Stakeholder Communication, Data Storytelling, Cross-functional Collaboration

Work Experience

Monroe University New Rochelle, NY
University Instructor, Computer Science & IT Sep 2025 – Present

- Delivered undergraduate and graduate courses in computer science for 100+ students each semester with applied, real-world focus.
- Designed hands-on labs using Python, C++ and SQL to strengthen analytical thinking and problem-solving skills.
- Improved student outcomes through structured feedback, project-based learning, and performance evaluation.

Sentari AI New York, NY
Product Management Intern (Data & AI) Jun 2025 – Dec 2025

- Analyzed 200+ user sessions, contributing to a 10% increase in prompt engagement during early product testing.
- Collaborated with engineering to optimize onboarding flows, reducing drop-offs through data-driven improvements.
- Defined product insights and experimentation strategies to improve user interaction and feature adoption.

Data Science Lab, Montclair State University Montclair, NJ
Researcher – Product Analytics & AI Systems Jan 2024 – May 2025

- Built RAG-based AI assistant to automate product insights, reducing analysis time by 90%.
- Applied NLP and machine learning techniques for scalable user behavior analysis.
- Designed evaluation frameworks to improve system accuracy and decision-making reliability.

Education

Montclair State University Montclair, NJ
Master of Science in Data Science, GPA: 3.97/4.00 May 2025

Institute of Engineering and Management Kolkata, India
Bachelor of Technology in Computer Science Jul 2020

Projects

- Personalized Prompt Generator (OpenAI GPT-Based Personalization System)**
- Identified a 40% prompt skip rate and designed an AI-driven personalization system using sentiment-based recommendations.
 - Led cross-functional sprint execution to launch MVP within 4 weeks, aligning product and engineering teams.
 - Improved engagement by 22% and reduced prompt skip rate by 35% post-deployment.

- Multi-Agent RAG System – Pharmaceutical Supply Chain Analytics**
- Led development of a multi-agent RAG system using LLMs, vector search, and orchestration pipelines for supply chain analytics.
 - Designed semantic retrieval and agent-based workflows to process structured and unstructured data for real-time decision support.
 - Achieved < 12s response time, > 90% answer relevance accuracy, and > 99.9% system up-time.

- Usage Analytics – Healthcare Application**
- Analyzed 50K+ user interaction records to identify low engagement in medication reminder features.
 - Discovered behavioral trends and user friction points through data exploration and visualization.
 - Enabled smart reminder improvements, increasing adherence rates by 14%.
